WORK EXPERIENCE

Blue Nucleus, Grand Valley State University

Grand Rapids, MI

Software Developer

February 2024 - Present

- Collaborated with client teams to define specifications for a web-based microservice utilizing Large Language Models (LLMs) for summarizing peer review activities, resulting in a 30% reduction in review time.
- Analyzed and curated peer review datasets to resolve inconsistencies, improving data quality by 25% using Pandas.
- Optimized fine-tuning strategies for the mistral-7b language model with PyTorch, achieving a 15% improvement in summarization accuracy.
- Conducted cost-efficiency analysis of Cloud GPU providers, that saved \$5,000 annually on training costs.
- Evaluated LLMs including Cohere, Gemini, and GPT-3.5, establishing a robust baseline summarizer.
- Developed an Android application using Kotlin and Firebase, integrating Google Maps API for location-based services.

Applied Computing Institute, Grand Valley State University

Grand Rapids, MI

Graduate Research Assistant - Full Stack Developer

January 2023 - December 2023

- Conceptualized and launched the AskLily chat feature for the GVSU Laker iOS app, integrating Conversational AI and APIs to enable natural language interaction, resulting in a 40% increase in user engagement.
- Leveraged Swift and Swift Web Views for real-time communication and seamless external content access within the app.
- Executed comprehensive testing via TestFlight, ensuring optimal app performance and identifying and fixing 50 bugs before iOS App Store deployment.
- Provided ongoing maintenance and updates for AskLily, resolving 90% of reported issues within 24 hours.
- Conducted research on Hugging Face LLMs, LangChain, and Neo4j for a dental hygiene chat app, integrating sophisticated AI algorithms for precise responses, resulting in an 85% user satisfaction rate.

PROJECTS

Eli AI Summary Microservice (EASM)

Grand Rapids, MI

Lead Software Developer

February 2024 – April 2024

- Designed and Engineered a RESTful microservice using Python Flask, integrating APIs for Cohere and Mistral-7b models to automate summarization.
- Achieved a 20% reduction in processing time for generating summaries through optimized API integration.

Smart Journal iOS Application

Grand Rapids, MI

Lead iOS Developer

August 2023 – December 2023

- Collaborated in a team to develop an iOS app using SwiftUI and Firebase, providing users with a platform to create and manage journal entries.
- Enhanced user satisfaction by 35% through implementation of secure data storage and user-friendly interfaces.

Rent-a-bike Application

Grand Rapids, MI

React Native Developer

January 2023 – May 2023

- Led the development of a mobile application using React Native and Firebase, streamlining the bicycle rental process.
- Designed and implemented both client-side and server-side architecture, including RESTful APIs.

SupApp

Grand Rapids, MI

Android Developer

May 2024 – Present

- Built a real-time chat application using Kotlin, and Firebase, demonstrating full-stack capabilities.
- Implemented key features including user authentication, real-time messaging, and friend request functionality.

AudioHub

Grand Rapids, MI

Web Developer

January 2023 – May 2023

- Engineered a full-stack web application using React.js for the frontend, Node.js with Express.js for the backend, and MongoDB for data storage.

EDUCATION

Grand Valley State University

Grand Rapids, MI

MS in Applied Computer Science (GPA: 3.9)

SKILLS

Skills: Programming Languages (Kotlin, Java, Swift, JavaScript, Python, C++, C#, Dart) | Mobile Development (Android SDK, Android Studio, React Native, Flutter, iOS Development, Xcode, Swift UI, Material Design) | Web & API Development (Java Spring Boot, RESTful APIs, Microservices, Node.js, Express.js, React, Python Flask, Angular, jQuery, GraphQL, HTML/CSS) | Cloud Services (AWS, GCP, Redis, Kafka) | Database (SQL, MongoDB, Firebase) | DevOps & Tools (Git, GitHub, Docker, Jira, Trello) | Testing & Deployment (TestFlight, Automated Testing, CI/CD)
